Medal Winning Boats

International boat manufacturers offer a wide range of hull shapes, to ensure you have the perfect boat for you, your crew or rowing program.

The track record of Filippi speaks for itself. You only have to tune into a World Rowing broadcast of any International regatta to see a race full of Filippi boats winning medals.

International athletes have the choice of any boat manufacturer, so there are clear reasons they choose Filippi year in and year out.

Olympic and World Champions in all boat classes, and numerous World Best Times are testament to the build quality, stability and performance of Filippi rowing shells.

CONSTRUCTION

All Filippi boats are made to the same uncompromising standards to provide the ultimate rowing shell. Filippi offer three levels of construction.

PERFORMANCE

This is the ultimate rowing shell. The carbon wing rigger, hilt, hilt holder, seat, foot stretcher and shoe plate are all hand crafted from high modulus monolithic carbon componentry. Titanium and carbon pin.

The benefit of the monolithic componentry not only offers stiffness but the lightweight of the rigger and all fittings optimises the specific layup of the hull, allowing more material and exploiting the aerospace grade carbon fibre properties.

Construction and materials

Specific hull layup to increase stiffness and exploit the advantages of monolithic Carbon Koridion components.

Carbon fabrics

1k, 3k, high-ultra high modulus, unidirectional fibre, pultruded carbon, HexMC® Filippi

Squared carbon fabric

High modulus carbon

Active foam core

zylon, honeycomb, aerospace epoxy resin,

glass fiber, 316 stainless steel bolts

PPG paints 2k polyacrylic UHS

hull&decks: Filippi white - stripes: Filippi blue

OLYMPIC

The Olympic class boat incorporates the Carbon Koridion footstretcher with the forged carbon componentry synonymous with Filippi quality and performance.

Carbon fabrics

1k, 3k, high-ultra high modulus, unidirectional fibre, pultruded carbon, HexMC® Filippi

Squared carbon fabric

high modulus carbon + standard fibre

zylon, honeycomb, aerospace epoxy resin,

glass fiber, 316 stainless steel bolts

PPG paints 2k polyacrylic UHS

hull&decks: Filippi white - stripes: Filippi blue

CORE

At the CORE of the construction is the signature feel—refined, reliable, and ready to row. It's our most approachable configuration, and you can be confident its core is pure Filippi.

Utilising the traditional carbon/aluminium foot stretcher, seat rails and aluminium riggers the CORE range is designed to make Filippi boats available to all those that dream of rowing the worlds most capable rowing shell.

CORE FEATURES

TRADITIONAL FOOTSTRETCHER

The CORE range features a traditional top bar with carbon foot stretcher. The shoe plate is also made of carbon.

ALUMINIUM RIGGER

The simple approach continues with the traditional stern mounted aluminium wing rigger

CARBON BEARING SEAT

Carbon top seat with height adjustment to finely tune your angle of attack.

FILIPPI MAS20 ROWING SHOES

Dual rotor performance shoes. Comfort combined with connection.

ALUMINIUM FIN AND RUDDER

Traditional aluminium fin and rudder with the legendary single screw removal system.

OLYMPIC FEATURES

KORIDION FOOTSTRETCHER

The OLYMPIC range features the brilliant new one piece KORIDION carbon foot stretcher. The shoe plate is also made of carbon.

ALUMINIUM OR CARBON RIGGER

Choose from stern or reverse mount carbon or stern mount aluminium wing rigger.

CARBON BEARING SEAT

Carbon top seat with height adjustment to finely tune your angle of attack.

FILIPPI MAS20 ROWING SHOES

Dual rotor performance shoes. Comfort combined with connection.

ALUMINIUM OR CARBON FIN AND RUDDER

Choose from the traditional aluminium fin and rudder or upgrade to a premium wing shaped carbon fin/rudder system.

PERFORMANCE FEATURES

CARBON KORIDION FOOTSTRETCHER

The PERFORMANCE range features the now legendary one piece Koridion Carbon foot stretcher - the ultimate in stiffness and connection with the hull. The shoe plate also features inbuilt splay adjustment.

ALIANTE CARBON KORIDION WING RIGGER

The artistry continues with the most significant advance in rowing technology in 3 decades with the new Aliante Koridion Reverse Wing rigger. Designed to transmit every ounce of athlete force into hull propulsion.

CARBON KORIDION SEAT

One piece carbon adjustable seat with inverted wheel with premium 316 stainless bearing system.

FILIPPI MAS20 ROWING SHOES

Dual rotor performance shoes. Comfort combined with connection.

CARBON FIN AND RUDDER SYSTEM

High modulus wing shaped carbon fin/rudder system. CFD analysis has led to a range of fins and rudders that optimise tracking of the hull in high winds while maximising efficiency.

OPTIONS

CUSTOM COLOURS

The Olympic and Performance boats are available to be customised with literally any colour combination you desire. The Core range is available with custom stripe colours. Custom colours are an additional cost.

BOAT & RIGGER COVERS

All carbon rigged boats come standard with rigger covers. The Performance range comes standard with a boat cover. Boat covers are available for both Olympic and Core boats at an additional cost.

MONOLITHIC SEAT AND CONVEX CARBON SEAT RAILS

The Performance single comes standard with these items while they remain an option for the Olympic range. These items are not available on the Core range of boats.

AGAINST ROWING SHOES

There is a no cost option available to upgrade your Rowing Shoes to Against Ultraleggera Rotor or 2 Strap Shoes.

CARBON FIN AND RUDDER SYSTEM

The Olympic and Core boats come standard with the aluminium fin/rudder. The Olympic boats can be upgraded to include a carbon fin and rudder system at an additional cost.

Filippi

SINGLES SCULLS

Sculling is a personal journey. You do the work, now it is time to ensure you have the equipment

Your Journey

The single scull is a personal experience. Whether it is your forever boat, or you simply want to sit on the start line in the World's Fastest Boat Filippi offer the perfect mould for your weight range, gender and preferred characteristics in a boat.

With the support of experienced rowers and coaches at Perfect Balance Rowing, we can ensure your investment exceeds your needs and gets you excited to hit the water each and every time.

Single Scull Mould List

Mould #	Boat Class	Boat Length	Beam Width	Athlete Weight
F44	1x	m. 7.40	cm. 26.0	50-60

Filippi

PAIR/DOUBLES

Pair/double are where the Filippi legend was created. The famous F13 and F17 boats are renowned for their stability, agility and rough water prowess!

Where the legend began

The legend that is the Filippi pair/doubles speaks for itself. Watch any international regatta featuring pairs or doubles from the last 20 years and the Filippi boats will be on the podium.

The design characteristics of the Filippi pair/doubles guarantees stability, responsiveness, and amazing rough water clearance. These characteristics allow the athletes to be comfortable, transfer their power to the blade face, and to feel a boat that is truly alive underneath them.

Pair/Double Mould List

Mould #	Boat Class	Boat Length	Beam Width	Athlete Weight
F36	2x/2-	m. 9.00	cm. 33.5	50-65

Filippi

COXLESS QUAD/FOURS

In Paris the F40 won Gold in both the men's coxless Quad and Four.

The domination of Filippi in medium boat classes is truly impressive.

World Domination

The Dutch men's coxless quad dominated the last Olympiad winning several World Championship wins of several lengths. These performances reflect the capability of Filippi boats.

As you move into medium and big boats the stiffness of the system (hull and rigger) becomes integral to performance. Aerospace grade prepreg carbon fibre, advanced laminating schedules, and the World leading fabrication of the Filippi engineers means the outstanding characteristics of the hull are matched only by the rowers that power these boats.

Coxless Quad/Four Mould List

Mould #	Boat Class	Boat Length	Beam Width	Athlete Weight
F53	4x/4-	m. 11.50	cm. 39.7	55-70
F11	4x/4-	m. 11.78	cm. 40.3	55-75
F43	4x/4-	m. 11.78	cm. 40.3	60-75
F34	4x/4-	m. 11.70	cm. 48.0	60-85
F31	4x/4-	m. 12.10	cm. 44.3	70-85
F52	4x/4-	m. 11.89	cm. 42.2	70-85
F28	4x/4-	m. 12.66	cm. 43.5	75-85
F19	4x/4-	m. 12.81	cm. 44.4	85-100
F25	4x/4-	m. 12.72	cm. 43.8	85-100
F38	4x/4-	m. 12.80	cm. 44.7	85-100
F40	4x/4-	m. 12.72	cm. 43.8	85-100
F61	4x/4-	m. 12.90	cm. 45.0	85-100

Filippi

COXED QUAD/FOURS

In recent years Filippi has enjoyed an unmatched level of success at the Australian Rowing Championships in the U19 and Schoolboy Coxed Four events.

Best They Can Be

If you look at the track record of the Filippi F34, F31 and F19 coxed quad/fours at both the World Rowing and Australian Championships there is an enviable history of success. As such if you are looking for a hull that is ready to allow your students to develop their skills, transfer their power to the blade face and be the best you can be then you cannot do better than the Filippi coxed range.

Available in 60-75kgs moulds for Schoolgirls (F34 and F31L), 70-85kgs for Schoolboys and Club Females (F31), and 85-100kgs for Club men (F19) there is a mould for every crew and every athlete.

Coxed Quad/Four Mould List

Mould #	Boat Class	Boat Length	Beam Width	Athlete Weight
F34	4+	m. 11.70	cm. 48.0	60-85
F31L	4+	m. 12.10	cm. 40.3	60-75
F31	4+	m. 12.10	cm. 44.3	70-85
F19	4+	m. 12.81	cm. 44.4	85-100

Filippi

EIGHTS

Filippi eights have become the must have halo boat for School rowing programs wanting to inspire students to row in the 1st VIII

Culture

We all know that inspiring the next generation of champions begins with culture. Whether it is winning the Head of the River or the U23 Eight at the Australian Rowing Championships, it begins with a vision.

Have a halo boat is the perfect way to inspire your rowers to greatness. A boat they aspire to race in. A boat that is not just about performing a function, but is a symbol of what your rowing program is and reflects the support offered to your rowers.

Whether it is the famous Gold in Tokyo won by the New Zealand men's eight, or the dominance of the Romanian women in Paris, it is clear if you have the right crew coached well, the boat will get the job done.

Eights Mould List

Mould #	Boat Class	Boat Length	Beam Width	Athlete Weight
F54	8+	m. 16.07	cm. 51.4	60-70
F42	8+	m. 16.80	cm. 59.0	60-85
